

DIABREAKER

Resin Brake Line

DESCRIPTION

DIABREAKER is made of a non-woven polyester filled with thermoplastic microspheres, laminated with a release film, and holding a spiral tube, which delivers the vacuum all along the product.

DIABREAKER avoids overconsumption of resin, by slowing down the resin as soon as the front gets into contact with it, while keeping the resin moving forward, and maintaining a good vacuum level.

DIABREAKER allows to drain entrapped air bubbles, to get fully infused fibers, and thanks to ELA20 release film, the product is easily peeled from the part, during demolding operation.

STORAGE

To be stored in its original packaging, protected from direct sunlight and humidity

CHARACTERISTICS / PRESENTATION

Color	Release	Max. Serv. Temp.	Thickness	Width	Weight	Length
Yellow / White	Yes (yellow side)	120°C	2 mm	100 mm	60 gr / m	50 m
